01 / THE QUESTION

# BETTER MODELS, BETTER HUMANS?

More human-like does not automatically mean more helpful.

Text → Voice → Face-to-face AI

# THE PARADOX

## Human + AI ≠ automatically the best team

106 experiments · 2024 meta-analysis

# WHAT WE DON’T KNOW

Does human-likeness improve decisions—or just trust?

Same advice. Different interface.

# THE STUDY

## Text / Voice / Video avatar

Measure: accuracy · following wrong advice · confidence

01 / THE QUESTION

# MODELS THAT KEEP LEARNING

Training should not be the last time a model learns.

Learn new things · Keep old skills

# TWO FAILURE MODES

## Forgetting + Loss of plasticity

Remember yesterday. Still learn tomorrow.

# A PROMISING, OPEN FIELD

Replay · Continual backprop · Sparse memory · SEAL

Different methods. Different trade-offs.

# THE STUDY

## A reproducible long-sequence comparison

Track: new-task learning · retention · plasticity
